*Tell me about yourself?

I am Ahsan Habib. I am a student and I studying at Govt. Azizul Hoque College Bogura. I am very interested in programming and web development. I know about programming languages. JavaScript is my crush language. I have created several websites with JavaScript, React.js, and Node Js. I try to explore new things all the time.

*Tell us about your best project?

The best project I have done so far is Go Wash. I have faced a lot of difficulties while doing this. Had trouble with selecting the design. Later I searched ThemeForest for a perfect design and somehow managed to select one. After solving the design problem, I had a problem with the Admin Panel section. To solve this problem I had to search google.

*Why we should hire you?

You can hire me as your company works on JavaScript, React.js, Node Js and I believe I can do your job as I have enough skills and qualifications necessary to make a significant contribution to your organization. I have created several websites using JavaScript, React.js, Node Js, and I like to take new challenges.

*What are your salary expectations?

My first priority is to enhance my knowledge and skills. My aim is to focus on my job. I want to complete my task full of dedication and devotion. Anyway, I didn't research much about your company's salary structure. It could be around 30000-40000 but you guys could give me some feedback or propose some better range that fixes the company's salary structure.

*Do you have any questions for us?

Can you share more about the day-to-day responsibilities of this role?

How would you describe the pace of a typical day?
